

Aeroprise Mobility for BMC Remedy Change Management

Mobilize BMC Remedy Change Management functionality, workflow and reports on handheld devices with Aeroprise's pre-configured, easy-to-use solution. Increase the speed and lower the risk of implementing changes to the IT infrastructure by enabling supervisors to approve or deny change requests anywhere, anytime.

Key Benefits

- » Manages change anywhere, anytime
- » Reduces business risk and disruption
- » Improves customer service
- » Strengthens regulatory compliance
- » Cuts IT support costs
- » Deploys in three days with no changes to BMC Remedy Change Management functionality
- » Automatically inherits and updates ITIL workflow on the mobile device
- » Gives managers real-time control of high-risk change processes
- » Lets staff mobilize specific fields, reports and alerts
- » Endorsed by Fortune 500 companies and U.S. government agencies

Business Challenge

Who responds to change requests after hours or when you are in meetings? Unauthorized changes can wreak havoc on your IT infrastructure and cost the business millions of dollars. Slow responses to change submissions delay the deployment of technology — from security patches to new systems. And a lack of real-time access to your change management violates IT Infrastructure Library® (ITIL®) processes, impedes business services and compromises audit trails.

The BMC Marketzone Direct Solution

Aeroprise Mobility for BMC Remedy Change Management allows IT technicians to manage change requests on smartphones, such as BlackBerry and Windows Mobile. Managers can review and respond to urgent issues in real-time. Extending the closed-loop change process to mobile employees helps ensure regulatory compliance, business continuity and proper documentation.

Aeroprise deploys in three days, with no modifications to the BMC Remedy application functionality. Information entered on the mobile device is instantly updated in the BMC Atrium Configuration Management Database (CMDB). For IT Infrastructure Library (ITIL) compliance, Aeroprise automatically inherits and updates any workflow changes made to the BMC Remedy application. The Administration Console lets you mobilize filters and active links with a few clicks. And users can easily extend specific fields, reports and alerts from the Personalization Console.

Lower risk and increase speed

Mobile IT managers who can approve or reject changes in real time, closely adhere to ITIL processes and respond to business issues faster.

Reduce business downtime

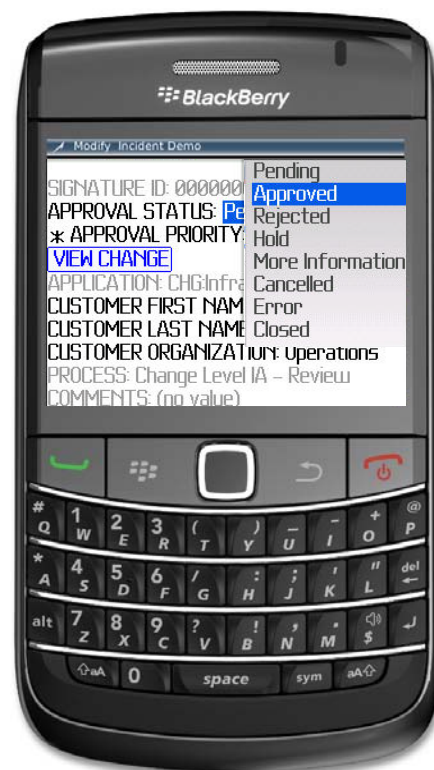

Instant alerts minimize downtime of critical systems by delivering real-time change information.

Decrease IT costs with higher productivity

Mobile technicians are often 30 percent more efficient when they don't have to return to the office to manage changes.

Gain a 360-degree view of your IT infrastructure

Controlling a complex IT infrastructure allows you to effectively support business priorities, such as growing revenue, reducing costs and lowering risk.

Mobile IT Management Service

Aeroprise provides mobility solutions for the following BMC Remedy applications:

- » IT Service Management
- » Service Desk
- » Change Management
- » Asset Management
- » Action Request System

BUSINESS RUNS ON I.T.
I.T. RUNS ON BMC SOFTWARE.

Business thrives when IT runs smarter, faster, and stronger. That's why the most demanding IT organizations in the world rely on BMC Software across both distributed and mainframe environments. Recognized as the leader in Business Service Management, BMC provides a comprehensive and unified platform that helps IT organizations cut cost, reduce risk, and drive business profit. For the four fiscal quarters ended September 30, 2009, BMC revenue was approximately \$1.88 billion. www.bmc.com for more information.

Features

- » **Manage Issues** - Create, update and reassign issues
- » **Work with Tasks** - Create, view and modify ad hoc incident tasks
- » **Relate Items** - Relate incidents or configuration items to other incidents
- » **Get Alerts** - Receive, acknowledge and open records with detailed information
- » **View Reports** - Provides up-to-date snapshots of key performance indicators
- » **Attachments** - Upload, download and delete BMC Remedy attachments as PDF, Word, Excel, GIF, JPG, and BMP files
- » **Search** - Quickly locate information in multiple trouble tickets
- » **Signature Capture** - Upload signatures captured from your Windows Mobile device
- » **Personalize** - Mobilize specific fields, workflow and ticket rules with a few clicks
- » **Security** - VPN-level security, including IP range restrictions, 128-bit AES encryption and session controls
- » **Automatic Device Optimization** - Applications are automatically tailored to the mobile device's screen, bandwidth, connectivity and processing power

Alignment with Best Practices

In your quest to align IT to business needs that optimize availability and reduce costs, you must ensure that mobility is a corner stone of your Business Service Management approach. A closed-loop ITIL process will make it easier for you to leave your desk knowing that business critical issues will be resolved, change requests will be managed successfully, and service level agreements will be met – even while you are remote.

Tie-in to Business Service Management

Mobility allows you to effectively manage critical business services. With Aeroprise, you enjoy better decision making, proactive service support and less complexity. A mobile service support solution also provides business transparency, visibility and control.

Technical Specifications

System Requirements

- » Microsoft Windows Server
- » Dual Core Processor / 2GB RAM / 3GB Available on Hard Drive / 32-Bit CPU

Integrations

- » BMC Remedy Change Management

Mobile Operating Systems

- » BlackBerry and Windows Mobile
